

# Justin Han

 (510)4566666 |  justinhan@berkeley.edu |  justinhan33.github.io |  linkedin.com/in/justinhan33 |  github.com/justinhan33

## EDUCATION

---

### University of California, Berkeley

Berkeley, CA

*Bachelors in Statistics with focus in Computer Science and Economics*

*Expected Graduation: May 2020*

- **Coursework:** Industrial Organization & Public Policy, Multivariable Calculus, Linear Algebra, Statistics, Discrete Mathematics & Probability Theory, Data Science, Structure and Interpretation of Computer Programs, Artificial Intelligence, Computational Data Analysis, Statistical Prediction & Machine Learning

## SKILLS

---

**Technical:** R, SQL, Python, Java, Tableau, Stata, HTML5, CSS, JavaScript, Git, JIRA, RStudio, MS Excel, MS PowerPoint, MS Word

## EXPERIENCE

---

### Wells Fargo

San Francisco, CA

*Strategy & Analytics Intern*

*June 2019 – August 2019*

- Reduced client wait times by implementing a digital tool for mobile and desktop banking platforms.
- Minimized quarterly costs by forecasting budgets for Agile development teams using financial models built in excel.
- Influenced a critical business decision of releasing a pilot to the enterprise by performing EDA on raw collected data.
- Collaborated with Team Leaders in structuring and developing a business strategy aimed to streamline internal operations.

### UC Berkeley Graduate Division

Berkeley, CA

*Data Researcher/Project Assistant*

*October 2018 – May 2019*

- Collected and analyzed UC Berkeley's graduate student data through surveys issued across 2500+ departments and implemented data visualization techniques for publication.
- Strengthened alumni relations by creating UC Berkeley's graduate school alumni networking system.
- Managed and collected a database of over 2,500 interdepartmental yearly graduates using LinkedIn, Excel and SAS.

### HS2 Academy

Fremont, CA

*Data Analyst Intern*

*June 2017 – August 2017*

- Increased company marketability by executing various data analysis techniques (i.e. data wrangling, reshaping, tidying, etc.) and created insightful along with visually appealing presentations for management and clients.
- Worked with and properly managed a large company database.

## EXTRACURRICULARS

---

### CAL Actuarial League

Berkeley, CA

*Team Lead*

*January 2018 – Present*

- Built models in excel and demonstrated critical thinking through analyzing case studies provided by Beam Dental (Health & Benefits), CSAA Insurance Group (Property & Casualty), and Aon (Retirement).
- Led a team to the final round of the Ninth Annual Actuarial Case Competition at UC Berkeley.

### Computer Science and Statistics Course Staff

Berkeley, CA

*Student Instructor/Lab Assistant*

*August 2018 – Present*

- Taught a small class about the concepts of statistical computing and the data analysis cycle using the R language.
- Helped students debug python/R code and recap important lecture topics (i.e. recursion, trees, data structures, algorithms, etc.).

## PROJECTS

---

### Search

- Designed a rational agent in python using different search algorithms (e.g. DFS, BFS, A\*, etc.) to drive decision making.

### Crime and Communities

- Implemented machine learning techniques to develop the best model to predict crimes using the crime and communities dataset provided by the University of California, Irvine.

### Shiny Application: Investing

- Created a web application in R that allows users to interactively visualize different saving and investing scenarios (in the absence of inflation).
